City College of NY— *Pre-Calculus tutor*
New York, NY

2013, Winter Semester

Helping students with their pre-calculus assignments and homework

PROJECTS

CodeQuiz — HTML, CSS, Javascript

A javascript centered project, the focus is to generate a password of choice using a combination of numbers, special characters, and uppercase/lowercase letters. The focus was to create global variables that can be called upon to be used that can be used in a for-loop to generate the password of choice..

Jaunt — HTML, CSS, Javascript, Web API's

Jaunt is an all in one road trip planner application built by a group of developers with many aspirations for the potential of this application. Using javascript and Web API's provided by google, this application can render routes and gas prices along the way for when a road trip is planned. There are still many great things to come for jaunt.

Shelfi— HTML, CSS, Javascript, NodeJS, Express, Databases

With the use of NPM packages this group project is called selfie. An application with the purpose of making searches for books much easier and enjoyable. With a nice 3d look, this application was built with the use of node js and various npm packages, calling upon our database to render a wide variety of book choices where the user can select from. Still under construction there are many plans for this application.

SKILLS

- HTML/CSS
- Javascript
- JQuery
- API's/ 3rd party API's/Server Side API
- BootStrap
- NODE.js
- Express.js
- MySQL/Express
- Mongo/Mongoose
- React
- Microsoft Word/ Powerpoint/Excel

LANGUAGES

- Fluent in Spanish {Writing and Speaking}

Education

- **Full Stack Coding Bootcamp**
University of Central Florida
Spring of 2021

- **Bachelor's Degree**
City College of New York
August 2011- May 2015
